1 Getting started

IronMan runs the whole ironing business in one place: customers book a pickup, staff track every garment through the hub, riders deliver and collect payment, and the office manages stock, invoices and cash.

Who	Where to go
Office staff	<code>console.ironmanindia.co</code>
Riders (field staff)	<code>ironmanindia.co/field</code> — open on a phone
Customers	<code>ironmanindia.co</code> → Schedule a Pickup

1.1 Logging in

Enter your email and password and press **Log in**. The menu on the left only shows the screens your role can use.

Demo environment logins (all use the password `IronMan@2026`): `founder@ironman.test`, `admin@ironman.test`, `operator@ironman.test`, `field@ironman.test`. These accounts exist only where the demo data has been loaded. Never use this password on real accounts.

1.2 About the demo data

The demo set contains one hub, six apartments, 24 customers and 44 orders spread across every stage, plus stock, invoices, payments and cash handovers. Because it is generated in one go, many timeline entries share the same time. You can create, edit and pay for anything freely.

2 Roles and what they can do

Role	Purpose
Founder	Everything, across all hubs. The only role that can set prices.
Admin	Runs the hub: everything except pricing, plus stock ledger, consumption rules, write-offs, credit notes, cash reconciliation and exports.
Operator	Day-to-day hub work: orders, intake, production, customers, stock receipts and issues, issuing invoices, recording payments.
Field	Rider app only: assigned pickups and deliveries, cash in hand.
Customer	Books pickups, tracks orders, views invoices.

The table below was produced by logging in as each role and requesting each area from the live system, so it shows what the system actually allows, not what we intended.

Area	Founder	Admin	Operator	Field

3 Daily operations

3.1 How an order moves

Scheduled → *Pickup assigned* → *Picked up* → *At hub* → *Intake verified* → *Pressing* → *Ready* → *Out for delivery* → *Delivered* → *Closed*. Each step is recorded with who did it and when. Problems (damage, missing item, failed pickup) are raised as *exceptions* without stopping the order.

3.2 Dashboard

Today at a glance: open orders, late pickups, deliveries and bookings. Click any order to open it.

IronMan Dashboard View all orders →

Welcome back, Aditi

3.3 Orders

Orders lists every order with its stage and amount, with search and filters. For a customer dropping clothes at the shop, press **New order**, pick the customer and service, set the garment counts and press **Create order**. The estimate comes from the current price list and is corrected when the hub counts the garments at intake.

IronMan Orders + New order

Every order, from booking to delivery.

3.6 Exceptions and route days

Exceptions is the queue of damaged, missing and disputed items, each with a severity, an owner and an SLA showing whether it is on track or overdue. **Route Days** (Admin and Founder) assigns the day's pickups and deliveries to riders.

3.7 Customers

Search customers, open one to see their addresses, notes, store credit and where they came from (*Acquired via*).

Lifetime orders and **lifetime spend** count *delivered* orders only. A new customer whose first order is still in progress shows 0 and the status *Lead* — this is expected.

4 Supplies (inventory)

Supplies tracks hangers, covers, bags and chemicals. A yellow banner lists items at or below their reorder level.

- **Receive stock** — record a delivery from a supplier, with quantity and unit cost.
- **Adjust stock** — record items used, wasted, returned, or a recount.
- **New item** — add a stock item with its reorder level.

Stock is also taken automatically when a garment is packed, using the consumption rules below.

Supplies
Stock items, receipts, issues and reorder levels.

Adjust stock Receive stock + New Item

The stock movement ledger and consumption rules are visible to Ops/Admin and Founder accounts.

5 Billing

5.1 Invoices and receivables

An invoice is created automatically when an order is delivered. **Invoices** shows every invoice with what is still owed. Filter by customer, status or date, or tick **Outstanding only** to see who owes money. Admins and Founders can **Export CSV** for the accountant.

If an invoice could not be created automatically, the order appears in a yellow *delivered without an invoice* panel at the top. Open the order and press **Issue invoice**.

Invoices
Every invoice issued, what's still owed, credit notes and PDFs.

Export CSV

Q Customer, phone, invoice or order... All statuses From mm/dd/yyyy To mm/dd/yyyy Outstanding only

6 invoices - ₹155.00 outstanding

INVOICE	CUSTOMER	STATUS	ISSUED	TOTAL	BALANCE
INV-2610-0006 ORD-2610-0044	Aditya Gupta	paid	03 Oct 2026	₹350.00	—
INV-2610-0005 ORD-2610-0026	Arjun Reddy	issued	03 Oct 2026	₹160.00	₹80.00

INV-2610-0001 ORD-2610-0009	Rohan Gupta	paid	03 Oct 2026	₹129.00	—

5.2 Payments, credit notes and write-offs

Open an invoice to download the PDF and:

- **Record payment** — cash, UPI or store credit; part payments are fine.
- **Issue credit note** (Admin, Founder) — reduce what the customer owes.
- **Write off** (Admin, Founder) — close a balance that will not be collected.

If a credit note is issued after the customer has paid, the invoice shows *Refund due*.

The screenshot displays the IronMan app interface for viewing an invoice. The left sidebar contains a navigation menu with options: Dashboard, Orders, Production, Customers, Apartments, Exceptions, Route Days, Supplies, Invoices (highlighted), Cash, Pricing, Partners, Analytics, Staff, and Notifications. The main content area shows the invoice details for INV-2610-0006, issued to Aditya Gupta (ORD-2610-0044). The invoice status is 'paid', and there are buttons for 'Download PDF' and 'Issue credit note'. The 'Items' section lists 'Bedsheet x 5' for ₹150.00 and 'Saree x 5' for ₹200.00, with a subtotal of ₹350.00 and a total of ₹350.00. The 'Credit notes' section indicates 'No credit notes issued.' The 'Payments' section shows a cash payment of ₹342.00 and a credit of ₹8.00, both dated 03 Oct, 2:00 am, resulting in a total paid of ₹350.00. The 'Details' section on the right shows the hub as 'IronMan — Koramangala', the customer phone as '+919870000023', and the issue date as '03 Oct, 2:00 am'.

6 Pricing, partners and messages

Pricing (Founder only) holds price lists per garment and offers; other roles see a restricted notice. **Partners** (Admin, Founder) registers watchmen and influencers and issues their referral codes. A customer who books with a code is credited to that partner automatically. **Notifications** shows every message the system has queued for customers.

SERVICE	STATUS	GARMENT TYPES PRICED	EFFECTIVE FROM
Ironing v1	active	5	19 Aug 2026

7 Field app (riders)

Riders open `ironmanindia.co/field` on their phone and log in. **Jobs** lists today's pickups and deliveries. A job shows the customer, address and a **Open in Maps** button; the rider scans the bag and marks it done, or reports a problem. **Cash** shows cash in hand and lets the rider **Hand over cash** to a hub staff member, who confirms the amount received; any shortfall is recorded against the rider. Actions taken without signal are saved and sent when the phone is back online.

8 Customers

Customers book from `ironmanindia.co` in seven short steps: pincode, address, service, garment counts, pickup slot, phone check and confirm. They can enter a referral code or say how they heard about us. Every order has a tracking link that needs no login, and customers can sign in to see order history, addresses and invoices.

The image displays three mobile app screens for the IronMan service.

Screen 1 (Left): The 'Where should we pick up from?' screen. It features a pincode input field with '560095' entered. Below the input, a checkmark icon and text state 'We service this area from IronMan — Koramangala.' At the bottom, there are 'Back' and 'Next' buttons.

Screen 2 (Middle): The order summary screen. It shows the IronMan logo, order ID 'ORD-2610-0037', and status 'Out for delivery'. A progress bar at the top indicates steps 1 through 7, with step 6 being the current step. The 'Items' section lists: Bedsheet x 3 (₹90.00), Shirt x 1 (₹15.00), and Saree x 1 (₹40.00). The total is ₹145.00, with a payment status of 'unpaid'. The 'Delivery details' section shows the address 'Flat 103, Prestige Lakeside Habitat' and the delivery time '04 Oct, 2:00 am'. The 'Timeline' section lists the following steps: Scheduled (03 Oct, 2:00 am), Pickup assigned (03 Oct, 2:00 am), Pickup en route (03 Oct, 2:00 am), Picked up (03 Oct, 2:00 am), At hub (03 Oct, 2:00 am), Intake verified (03 Oct, 2:00 am), Pressing (03 Oct, 2:00 am), Ready (03 Oct, 2:00 am), Delivery assigned (03 Oct, 2:00 am), and Out for delivery (03 Oct, 2:00 am).

Screen 3 (Right): The 'Sign in to your account' screen. It has a 'Phone number' input field with '98765 43210' entered. Below the input is a 'Send code' button.

Not yet live for real customers: signing in and booking need a code sent to the customer's phone. Text-message sending is not connected yet, so these steps can only be tried in the demo environment.

9 Not in this build yet

- **Analytics** and **Staff** screens show *Coming soon*. Staff accounts are created by the IronMan team for now.
- GST tax invoices — waiting on the business's GST details.
- WhatsApp and SMS messages to customers, including login codes.
- Online payments (cash and UPI at the door are recorded today).
- Partner commissions and payouts, campaigns and marketing spend.
- iPhone and Android apps (the web works on phones today).

10 Reporting a problem

Send a screenshot with: the screen, your role, the time, and the order or invoice number if there is one. Every action in IronMan is logged with the person and time, so this is enough for us to trace it.
